Experiment – 5: To implement continuous integration with Jenkins

List of screenshots to be included in this experiment

7b. Execute following (Refer the shared material) and attach screenshots:

- Build jobs in Jenkins

1. Python freestyle project – simple python script (implicit)

The screenshot shows the Jenkins Dashboard. On the left, there's a sidebar with navigation options: People, Build History, Project Relationship, Check File Fingerprint, Manage Jenkins, My Views, and New View. Below this, there's a 'Build Queue' section showing 1 Idle and 2 Idle build executors. The main area displays a table of build jobs. The 'New Item' button is highlighted with an orange box. The table has columns for Status (S), Workflow (W), Name, Last Success, Last Failure, Last Duration, and a play button icon. The jobs listed are:

S	W	Name	Last Success	Last Failure	Last Duration
❌	🔗	Dev_prac123	N/A	9 mo 21 days #30	0.34 sec
⋮	⚙️	devgit	N/A	N/A	N/A
✅	⚙️	devgit1	1 day 17 hr #1	N/A	7.2 sec
✅	⚙️	Devops_exp4_prj	4 days 23 hr #1	N/A	0.38 sec
❌	🔗	DevOps_prac123	N/A	9 mo 21 days #21	0.45 sec
✅	⚙️	devops_prj2	4 days 23 hr #1	N/A	0.34 sec

» Required field

Freestyle project

This is the central feature of Jenkins. Jenkins will build your project, combining any SCM with any build system, and this can be even used for something other than software build.

Maven project

Build a maven project. Jenkins takes advantage of your POM files and drastically reduces the configuration.

Pipeline

Orchestrates long-running activities that can span multiple build agents. Suitable for building pipelines (formerly known as workflows) and/or organizing complex activities that do not easily fit in free-style job type.

Multi-configuration project

Suitable for projects that need a large number of different configurations, such as testing on multiple environments, platform-specific builds, etc.

Folder

Creates a container that stores nested items in it. Useful for grouping things together. Unlike view, which is just a filter, a folder creates a separate namespace, so you can have multiple things of the same name as long as they are in different folders.

"num = 5
if num < 0:
    print("Enter a positive number")
else:
    sum = 0
    # use while loop to iterate until zero
    while(num > 0):
        sum += num
        num -= 1
    print("The sum is", sum)"
```

The screenshot shows the Jenkins configuration interface for a job named "EXP5part2sherwin". The "Build Environment" tab is selected, displaying a list of checkboxes for environment settings. Below this, the "Build" section contains a "Script" field with a Python code snippet. The script is: `num = 5`, `if num < 0:`, `print("Enter a positive number")`. The "Script" field is highlighted with a blue border. At the bottom of the configuration page, there are "Save" and "Apply" buttons.

3. Maven freestyle project – Fork repository and Build goals, verify creation of jar/war

The screenshot shows the GitHub interface for a repository named 'HelloWorld' by user 'darkleon'. The repository is public and has 275 forks, 2 watchers, and 0 stars. The repository description is 'Hello World java war sample via maven for jenkins testing'. The repository contains a README.md file and a src/main directory. The commit history shows a series of updates to the HelloWorld.java file, the first commit being 8 years ago. The repository is currently on the master branch with 1 branch and 0 tags. The repository is also listed as a dependency in the pom.xml file.

Repository Details:

- Repository: HelloWorld (Public)
- Owner: darkleon
- Watchers: 2
- Forks: 275
- Stars: 0

Repository Description: Hello World java war sample via maven for jenkins testing

Repository Contents:

- src/main: Update HelloWorld.java (8 years ago)
- README.md: first commit (8 years ago)
- aaa: Update aaa (6 years ago)
- myscript.zip: Add my sql script with fix (8 years ago)
- pom.xml: Update pom.xml (8 years ago)

Repository Activity:

- darkleon Update aaa (6f0db47 on Oct 25, 2017) 25 commits

Repository Metadata:

- master branch, 1 branch, 0 tags
- Go to file, Add file, Code

Repository Files:

- README.md: HelloWorld

Repository Statistics:

- Readme
- Activity
- 0 stars
- 2 watching
- 275 forks
- Report repository

Repository Releases:

- No releases published

Repository Packages:

- No packages published

Repository Languages:

-

The screenshot shows the GitHub repository page for 'darkleon / HelloWorld'. The repository is public and has 275 forks, 2 watchers, and 0 stars. The 'Fork' button is highlighted with a red box, and a tooltip says 'Fork your own copy of darkleon/HelloWorld'. The repository has 1 branch (master) and 0 tags. The file list includes 'src/main' (Update HelloWorld.java, 8 years ago), 'README.md' (first commit, 8 years ago), 'aaa' (Update aaa, 6 years ago), 'myscript.zip' (Add my sql script with fix, 8 years ago), and 'pom.xml' (Update pom.xml, 8 years ago). The README.md content is 'HelloWorld'. The right sidebar shows the 'About' section with the description 'Hello World java war sample via maven for jenkins testing', 'Readme', 'Activity', '0 stars', '2 watching', '275 forks', and 'Report repository'. Below this are sections for 'Releases' (No releases published), 'Packages' (No packages published), and 'Languages'.

The screenshot shows the GitHub repository page for 'Srienzo / HelloSherwin', which is a fork of 'darkleon / HelloWorld'. The repository is public and has 285 forks, 0 watchers, and 0 stars. The 'Fork' button is highlighted with a red box, and a tooltip says 'Fork your own copy of darkleon/HelloWorld'. The repository has 1 branch (master) and 0 tags. The file list includes 'src/main' (Update HelloWorld.java, 8 years ago), 'README.md' (first commit, 8 years ago), 'aaa' (Update aaa, 6 years ago), 'myscript.zip' (Add my sql script with fix, 8 years ago), and 'pom.xml' (Update pom.xml, 8 years ago). The README.md content is 'HelloWorld'. The right sidebar shows the 'About' section with the description 'Hello World java war sample via maven for jenkins testing', 'Readme', 'Activity', '0 stars', '0 watching', '285 forks', and 'Report repository'. Below this are sections for 'Releases' (No releases published, Create a new release), 'Packages' (No packages published, Publish your first package), and 'Languages'.

Freestyle project

This is the central feature of Jenkins. Jenkins will build your project, combining any SCM with any build system, and this can be even used for something other than software build.

Maven project

Build a maven project. Jenkins takes advantage of your POM files and drastically reduces the configuration.

Pipeline

Orchestrates long-running activities that can span multiple build agents. Suitable for building pipelines (formerly known as workflows) and/or organizing complex activities that do not easily fit in free-style job type.

Multi-configuration project

Suitable for projects that need a large number of different configurations, such as testing on multiple environments, platform-specific builds, etc.

Folder

Creates a container that stores nested items in it. Useful for grouping things together. Unlike view, which is just a filter, a folder creates a separate namespace, so you can have multiple things of the same name as long as they are in different folders.

Multibranch Pipeline

Creates a set of Pipeline projects according to detected branches in one SCM repository.

Folder

Creates a set of multibranch project subfolders by scanning for repositories
